TAEKWON KIM

FULL-STACK DEVELOPER

PROFILE

Full-Stack Developer with experience in collaborative environments, designing secure and scalable applications. Eager to learn emerging technologies and adapt to dynamic challenges, with a strong commitment to contributing innovative solutions for global impact.

PROJECTS

PinPoint Meet You

Backend Developer & Team Leader

Led development of a web and mobile application enabling university students to share interests and organize safe meetups. Enhanced user experience through location-based features for marking and tracking meeting points.

- Collaborated weekly with Uracle to refine project goals and plans, improving project efficiency by 20%.
- Completed Morpheus training provided by Uracle company and transformed the web app into a hybrid mobile app.

SnapJournal

Personal Project - On going

A full-stack web application designed to manage photos and journals by enabling users to upload photos, extract metadata, and create journal entries.

User Registration and Email Verification

- Implemented email verification process to active accounts via a link.
- Designed secure authentication using JWT.

BOOT CAMP

Completed 600+ hours full-Stack Engineering Bootcamp:

Training in Spring Boot, React.js, MySQL, Android Studio, focusing on full-stack development and project-based learning.
